

CHRISTRIO™

Xpress Gel Application Instructions

1. Prep the nails as usual. Wipe the nails thoroughly with BASIC ONE Wiping Solution and wait for the solution to dry (a chalky white finish will appear).

2. Apply a thin coat of BASIC ONE Clear Gel to the one nail. Drip and drag a horizontal line where the tip meets the nail bed to build thickness/stress point and to create a natural curve. Cure this nail under the BASIC ONE UV Light while applying BASIC ONE Clear Gel to the same finger on the opposite hand. Alternate fingers/hands until BASIC ONE Clear Gel has been applied to all ten nails.

3. Using the Xpress Gel in White (#13) and the Designer Brush, outline the rose petals. Cure for a second and alternate fingers/hands as shown in step #2.

4. Using Xpress Gel in Hot Pink (#10) and CHRISTRIO's Gel Designer Brush, fill in the area inside the white outlines. Cure for a second and alternate fingers/hands as shown in step #2.

5. Using the Xpress Gel in Kiwi (#6) and the Designer Brush, draw leaves and stems around the rose as desired. Cure for a second and alternate fingers/hands as shown in step #2.

6. Apply a final coat of BASIC ONE Clear Gel to the entire nail by dripping and dragging the gel vertically. Cure for several seconds and alternate fingers/hands as shown in step #2. After the Clear Gel is applied to all nails, cure for 3-4 minutes.

7. Wipe the nails with BASIC ONE Wiping Solution. Shape the sides and tip of the nails with a file and wipe one last time with BASIC ONE Wiping Solution to remove dust

Please Note:

*If entire gel nails are soft and peel off within hours/days, this means that the nails were under cured.

*If nails break/crack, are bendable, or chip/crack; this means that the gel application was too thin.

*If gel lifts around cuticle area, this means lack of prepping. If necessary-for oilier nails, wipe with Wiping Solution twice prior to gel application.
