

# CHRISTRIO

Manufacturer of Beauty Products

1950 Compton Ave. Ste. 103

Corona, CA. 92881

Phone: (951) 808 – 4730 Fax: (951) 808 – 4734

## MATERIAL SAFETY DATA SHEET

### Section I: Product Identification

**Product name:** BASIC ONE – Designer Gel (All Colors)

**Chemical Name:** N/A

**Manufacturer:** CHRISTRIO CORP.

1950 Compton Ave. #103

Corona, CA. 92881

**Family Name:** N/A

**Product Use:** For Professional Use Only

**Emergency Phone #:** 800 535- 5053

**International Phone #:** 1-352-323-3500

**Information Contact:** (951) 808 – 4730

### Section II: Product composition/Ingredients

| Chemical Identity/ INCI Name       | CAS#       | Exposure<br>OSHA<br>TWA/STEL | Limits<br>ACGIH<br>TWA/STEL | Carcinogen<br>IARC/NTP/<br>OSHA | %  |
|------------------------------------|------------|------------------------------|-----------------------------|---------------------------------|----|
| Di-HEMA Trimethylhexyl Dicarbamate | 72869-42-4 | N/E                          | N/E                         | Not Listed                      | 92 |
| Hydroxycyclohexyl Phenyl ketone    | 947-19-3   | N/E                          | N/E                         | Not Listed                      | 5  |
| Benzophenone                       | 119-61-9   | N/E                          | N/E                         | Not Listed                      | 1  |

N/E – None Established

N/R – Not Reviewed

ND/A – No Data Available

N/A – Not Available

### Section III: Hazard Identification

#### EMERGENCY OVERVIEW

- May be slight toxic.
- May cause chemical burn in eye.
- May cause moderate skin injury (reddening & swelling).

#### Potential Health Effects, Sign and Symptoms of Exposure:

|                        |   |
|------------------------|---|
| Primary Route of Entry | No specific information is available.   |
| Eye                    | No specific information available. Contains materials that are essentially nonirritating, but contact may cause slight transient irritation   |
| Skin                   | No specific information available. Skin over exposure or prolonged contact may cause moderate skin injury (reddening and swelling) and/or sensitization in some sensitive of individuals. Since irritation may not occur immediately, contact can go unnoticed. |
| Ingestion              | No specific information available. Contains materials that may practically nontoxic. However, it may cause gastrointestinal irritation with nausea, vomiting and diarrhea.  |
| Inhalation             | No specific information available. Low volatility makes vapor inhalation unlikely. Aerosol can be irritating.   |
| Sub-Chronic effects    | No specific information available. Limited tests showed no evidence of teratogenicity in animals. A life time skin painting study with a mice showed no evidence of carcinogenicity.  |

NOTE: Refer to Section 11, Toxicological Information for details.

### Section IV: First Aid Measure

|                    |  |
|--------------------|--|
| First Aid for Eye  | Flush with plenty of lukewarm water for 15 minutes and seek medical attention immediately.   |
| First Aid for Skin | Remove contaminated clothing and wash contact area with soap and water for 15 minutes. Get medical aid if symptom persisted. Wash clothing before reuse. |

First Aid for Inhalation      In case of exposure to a high concentration of vapor or mist, remove person to fresh air. If breathing has stopped, administer artificial respiration and seek medical attention.

First Aid for Ingestion      Never give anything by mouth to an unconscious person. DO NOT induce vomiting. If conscious and alert, rinse mouth and drink 2 to 4 cupfuls of milk or water immediately and seek medical attention.

**Section V: Fire fighting Measures**

| Flash Point<br>(°F/°C) | Flammable Limit<br>(vol%) | Auto-ignition Temperature<br>(vol%) |
|------------------------|---------------------------|-------------------------------------|
| >212°F/100°C Setaflash | ND/A                      | ND/A                                |

**Method:**

*\*This product is a combustible liquid. This product may ignite readily and decompose to produce carbon oxides.*

Extinguishing Media:      Use dry chemical for small fires; aqueous foam or water for large fires.

Fire Fighting Instructions:      Remove all ignition sources. Wear self-contained breathing apparatus and complete personal protective equipment when entering confined areas where potential for exposure to vapors or products of combustion exists.

Unusual Hazards:      High temperatures and fir conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessels or containers. Avoid the use of a stream of water to control fires since frothing can occur.

**Section VI: Accident Release Measures**

Spill or Release Procedure:      Spontaneous polymerization can occur. Although material is non-flammable, please try eliminate all sources of heat and ignition. Soak up spill with inert solids (such as clay or vermiculite) and sweep/shovel into disposal container. Wash spill area with strong detergent and water solution; rinse with lukewarm water, but minimize water use during clean up. Do not flush to sewer! US Regulation (CERCLA) require reporting spills and release to soil, water, and air in excess of reportable quantities. The toll free number for the US Coast Guard National Response Center is (800) 424-8802. EU Regulations require the consultation of Directive 98/24/EC. If a leak or spill has not ignited, use water spray to disperse the vapors. Dispose and report per regulatory requirements if necessary. Please prevent washings from entering waterways.

**Section VII: Handling and Storage**

Handling      Avoid contact with skin and eyes, and clothing. Use with adequate ventilation and avoid breathing in vapor. Keep container closed when not in use. Avoid prolonged exposure to light. Remove all contaminated clothing, shoes, belts and other leather goods immediately. Incinerate leather goods (including shoes). Wash contaminated clothing thoroughly

before reuse. Wash skin thoroughly with soap and water after handling. Solvents should not be used to clean skin because of increased penetration potential. **Material is extremely light sensitive.** Use extreme care and do not expose to natural or UV light. Unless using material for it's purposes. Since the material is very photosensitive any type of light may initiate the harden (cure) process.

**Storage** Store in a tightly closed container. Store in a cool, dry place, away from heat and light. Store at temperatures below 100°F/38°C. Store product in a totally opaque container.

**Explosion Hazard** High temperature and fire conditions may cause rapid and uncontrolled polymerization which can result in explosions and the violent rupture of storage vessel or containers.

**Section VIII: Exposure Controls/Personal Protective Equipment**

**Engineering Control** Local exhaust recommended to control exposure which may result from operations generating aerosols and hot operations generating vapors.

**Personal Protective Equipment**

**General** To identify additional Personal Protective Equipment (PPE) requirements, it is recommended that a hazard assessment in accordance with the OSHA PPE Standard (29CFR1910.132), or European Standard EN166 be conducted before using this product. Provide eye wash station impervious clothing to prevent ANY contact with this product, such as gloves, apron, boots, or whole body suit. Nitrile rubber is better than PVC.

**Eye/Face Protection** Wear chemical splash goggles.

**Skin Protection** Wear impervious gloves (Neoprene).

**Respirator Protection** A NIOSH/MSHA approved air purifying respirator with an organic vapor cartridge or canister may be permissible under certain limited circumstances where airborne concentrations are expected to exceed exposure limits. Protection provided by nuisance level organic vapor dust masks can be used, however the use of the respirator is limited. Follow OSHA respirator regulations found in 29 CFR 1910.134 or European Standard EN 149.

**Section IX: Physical and Chemical Properties**

|   |  |                  |   |                          |  |

### Section X: Stability and Reactivity

**Stability:** Normally Stable

**Incompatibility (Materials to Avoid):**

Polymerization initiators including peroxides, strong oxidizing agents, copper, copper alloys, carbon steel, iron, rust and string bases.

**Hazardous Decomposition Products:** Fumes produced when heated to decomposition may include: carbon monoxide, carbon dioxide.

**Hazardous Polymerization:**

May occur—Uncontrolled polymerization may cause rapid evolution of heat and increased pressure that could result in violent rupture of sealed storage vessels or containers.

**Condition to Avoid:**

Storage > 100°F/38°C, exposure to light, loss of dissolved air, loss of polymerization inhibitor, contamination with incompatible materials.

### Section XI: Toxicological Information

| Acute Oral<br>Toxicity | Acute Dermal<br>Toxicity | Acute Inhalation<br>Toxicity | Irritation-Skin | Irritation-Eye |

|------------------------|------|
| Biodegradability       | ND/A |
| Chemical Oxygen Demand | ND/A |

\*To be best of our knowledge, the ecotoxicological and chemical fate properties have not been thoroughly investigated.

\*Do not allow to entering water supplies, waste water, or soil.

### Section XIII: Disposable Concentrations

Non-contaminated, properly inhibited product is not a RCRA hazardous waste. Comply with all Federal, State and local regulations. Dispose of diking materials and absorbent in compliance with State, Local, and Federal regulations. Residual vapors may explode on ignition; do not cut, drill, or weld on or near the container. Mix with compatible chemical which is less flammable and incinerate.

**Section XIV: Transport Information**
