3D GEL - BASIC 3D FLOWER APPLICATION

STEP 1:

Prep nails as desired. Choose 3D Gel color of your choice and scoop out a small amount with the dot tool side of the 3D Gel Brush by Christrio. Apply to nail.

STEP 2:

Using the 3D Gel Brush, begin to form the 3D Gel into the shape you desire. Here we are going to create a basic 3D flower. Dab a small amount of Basic One Wiping Solution on brush to allow more fluidity while designing. This will help you as you continue to sculpt the desired design.

STEP 3:

Continue to sculpt the desired design. Our 3D Gel will not set until you cure your design. You have plenty of time to work with the 3D Gel to design whatever you would like!

STEP 4:

You can continue to add more details to your nails. We added more petals and smaller flower details.

STEP 5:

Once you are finished creating, go ahead and cure your design under an LED/UV lamp. **Note:** You can add as many layers as you would like, just be sure to cure your first layer before creating another layer.

STEP 6:

Wipe final design with Basic One Wiping Solution and you are done! You can add a top coat if you'd like, but it is not necessary.

PLEASE NOTE:
