LED/UV CURE

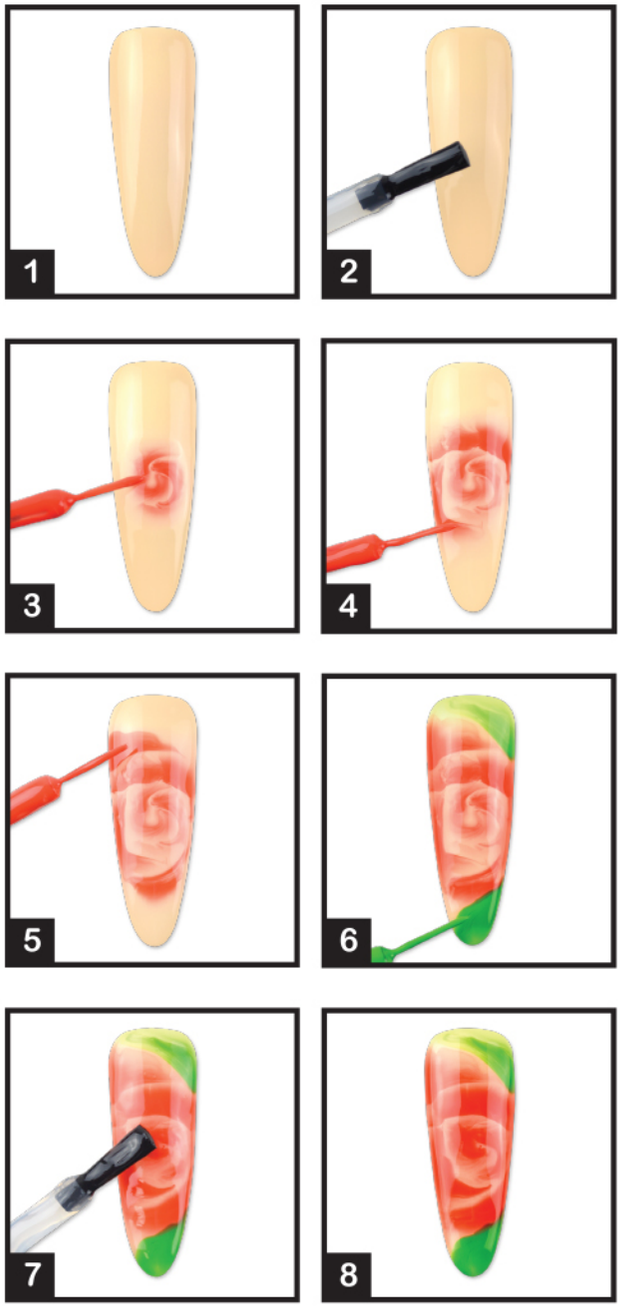
12 gorgeous colors & 3 base colors

CHRISTRIO®

EASY TO FOLLOW

STEP BY STEP



THE CHERRY BLOSSOM

AQUARELLE GEL

Step 1: Thoroughly prep nails. Choose your favorite gel color for your base and cure. We used Diamond Gloss Gel in #75.

Step 2: Apply a thin layer of our Aquarelle Gel in Clear Base. Do NOT cure and continue to Step 3.

Step 3: Very carefully apply Aquarelle Gel in #10 at the center of the nail to create half of a circle. The gel will begin to spread creating a petal like design.

Step 4-5: Continue to create more half circles around the center petals, each time allowing the gel to spread.

Step 6: Using Aquarelle Gel in Green #3 add small leaves to the outer edges of your flower design. Be sure to cure your final design for 1 minute in an LED Lamp or 2 minutes in a UV Lamp.

Step 7-8: Once cured, finish off your design by applying your favorite top gel. We recommend using our PolyShine No Cleanse Top Gel for a beautiful shiny finish!

These beautifully pigmented Aquarelle Gels are easy to use and produce flawless results!
